

The MEX Engineering Team

# Creating a System Tailor-Made for You

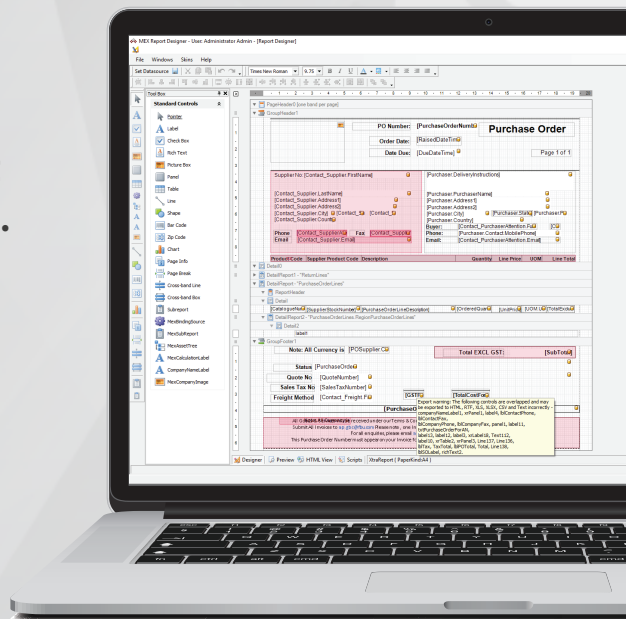

## Customisation Made Easy

The MEX Engineering Team can customise MEX to behave exactly the way you want it to and tailor your system to suit your needs.

Creating custom reports and system modifications by request is something we have done for a while now, and is a credit to the flexibility of the MEX system.

For this process, a job is ordered, the customer is consulted and then we go away and customise the job as specified. On delivery, if the result is not as expected, another consultation is carried out and we go away again.

Here at MEX we understand our customers and know that time is a precious element when it comes to maintenance.

## What can we do?

### Custom Reports

MEX has the capacity to report on all information that has been entered into the system. Outside of the 230+ existing reports in MEX, our customers regularly request for customised reports. With their extensive expertise in SQL, the MEX Engineering team can modify existing reports, create brand new reports and Dashboard KPIs and even merge reports.

### Data Imports

MEX has inbuilt import functionality that allows our users to import a specific set of data. Outside of that our Engineering team can pretty much import anything into MEX. The main ones we carry out are Assets and large sets on inventory data. You name it we can import it. We can also set up advanced exports out of MEX and into the system of your choosing.

### Integrations

MEX Engineering can integrate any system with MEX. The most frequent integrations that we are asked to do are with Financial Packages (SAP, Dynamics, MYOB), Readings (SCADA, Visionlink, Citec) & Requests. We can also modify existing forms, listings & entire modules to suit your maintenance practices. Even start from scratch & build a new module.

### STANDARD REPORTS

Our Engineering team can modify existing reports, create new Reports or KPIs or even merge reports. The cost for a standard custom report is \$1,600 + GST.

### ADVANCED REPORTS

For those custom reports that are more advanced further work needs to be put into them. The cost for an advanced report is \$3,300 + GST

### DATA IMPORTS

Outside of the standard inbuilt import functionality in MEX, our Engineering team can pretty much import anything. The standard cost is \$2,000 + GST.

### FINANCIAL INTEGRATIONS

MEX is frequently integrated with Financial Packages including MYOB, Xero and Quickbooks. The cost for a Financial Integration starts at \$3,000 + GST.

### CUSTOM SYSTEMS

We can also modify existing forms, listing and entire modules to suit your maintenance practices. Any customisation is Price on Application.

### OTHER INTEGRATIONS

MEX Engineering can integrate any system with MEX. The cost for an Integration depends on the complexity of the work so is Priced on Application.
