

Now you can control your maintenance operation from anywhere!

MEX for iPad, iPod and iPhone

MEX is now available on the iPad, iPod and iPhone.

To keep your operations competitive in the market, it is important to see the state of your operations at all times - this can now be done with MEX for iPad, iPod and iPhone. In V2 of MEX iPad you have far greater control over your maintenance operations. From Assets to Reporting, MEX has expanded its iPad application to make it easier for you to do your job anywhere, anytime.

Work Orders

Manage all your work wherever you are. Add, edit, print, complete and sign off work orders.

Assets

Complete management of your assets and equipment whilst in the field. Add assets in the field, take a photo as you do your rounds, see what work is due and view any data.

Requests

Manage all your job requests from the palm of your hand. Add, edit, approve, create work orders, cancel, and comment. Anyone can now enter requests anywhere, anytime.

MEX Today

The ultimate management tool for MEX. Be anywhere and your graphs will keep you up to date.

Scan Issue

Scan in your product barcodes realtime with the MEX Scan Issue Module for the iPhone and iPod.

Purchasing

Ever wanted to raise a purchase order on the job? MEX iPad is a complete purchasing system in your hands. Add, edit orders, approval system, release orders, receive goods, check estimated and actual prices as stock arrives.

Note: The Stores Module of MEX is required for this module to be activated on the iPad.

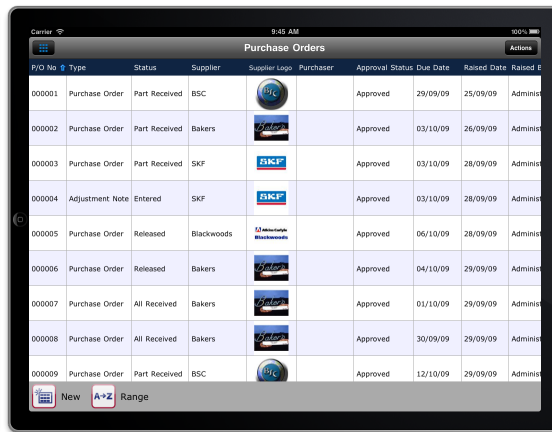

Reports

All your MEX reports are now on the iPad. You are now no longer tied to a computer and can find out any information instantly.

MEX makes it simple

What features does it have?

Six modules from MEX; Assets, Work Orders, Requests, MEX Today, Purchasing, and Reports are now available on the iPad.

Some features include:

- Ability to select one of 6 languages from the MEX language pack
- Access Work Orders, create, edit and close to history
- Print and email anything from Work Orders, Invoices, Requests, Reports
- Add Purchase Orders for any Work Order
- Filter and save preferences to filter Work Orders
- Issue parts to a Work Order via a barcode scanner (barcode scanner must be bought separately)
- Capture signatures of the customer or tradesman
- View, create and edit Asset Register module
- Add images for details tab of any Asset
- View, create and edit Purchase Orders
- Approve or decline Purchase Orders
- Approve or decline Requests
- With over 230 free reports in MEX, view, print or email with the ability to save favourites
- Personalise your system with MEX today; arrange by Work Orders addressed to you or your trade code
- See all your relevant reports and KPIs aggregated into one place
- And more...

How does it connect to MEX / FleetMEX?

Either via wireless network or 3G connectivity.

What if the network drops out while I am doing a work order?

No problems, the Work Order that you are currently working on will not disappear.

You just have to wait for your communications link to come back on line so you can save the record.

If I am an existing user of MEX how do I start using it?

- Step 1** – Download the application from App store on your iPad.
- Step 2** – Download the web server install from MEX, or request a CD.
- Step 3** – Run the server install.
- Step 4** – Open up MEX on the iPad and point to your datafile.
- Step 5** - Start using it.

How can I trial this?

Download the app from iTunes or the App Store on your iPad, open up MEX and select "Connect to Demo". It has been set up to run on our web servers so you can trial it.

How much does this cost?

It may not cost you anything. Each iPad user consumes one of your existing concurrent user licenses of MEX.

Is there anything I need to do at the PC end of MEX?

There is a need to do a server install where the database of MEX resides. This server install sets up MEX so that it can communicate with the iPad.

How do I get the server install?

Download this from the user portal at www.mex.com.au or contact us to have a CD sent to you.

What does the server install do?

The install will set up your MEX database to communicate with the iPad.

Will the world be a better place if I use MEX iPad?

Yes, it will, because now you can go totally paperless in your operation.

Contact MEX on +61 7 3392 4777 or email info@mex.com.au for more information.
