

Dashboard

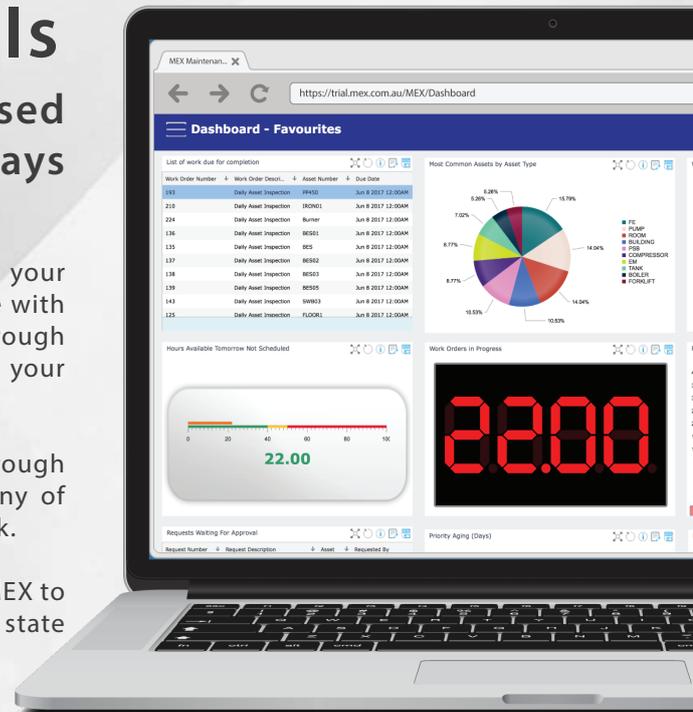

Online Reporting & KPIs

The MEX Dashboard is a web based reporting tool that captures and displays all of your maintenance KPIs.

The MEX Dashboard is a web-based reporting tool that displays your maintenance operation's Key Performance Indicators (KPIs). Free with your purchase of MEX, Dashboard shows you this information through a series of graphs, gauges and lists that draws information from your MEX database.

Experience this easy to access, web-based, graphical interface through your regular MEX system. By customising the authorisation, any of your staff can view the information relevant to them, without risk.

The MEX Dashboard comes with 99 preloaded KPIs designed by MEX to give you comprehensive insight into your organisation and the state of your maintenance operation.

The On the Go Maintenance Monitoring Tool! Managers often have to make critical decisions in the field, with the latest MEX Dashboard you now have instant access to all your operational key performance indicators on your phone or tablet.
