SMART MAINTENANCE MANAGEMENT.

MEX is a leading provider of CMMS solutions that excel in various areas. Asset management is a particular strength of MEX's CMMS system, which is designed to help organisations of all sizes efficiently manage their assets throughout their life cycle. With comprehensive work orders capturing tasks, trades, spares, documents and more, MEX's system is a powerful tool for managing maintenance activities and streamlining operations. The system also features robust preventative maintenance and inspections capabilities, enabling users to stay ahead of potential issues and ensure their equipment remains in top condition.

Request management is another standout feature, with an intuitive MEX Ops online portal that makes it easy for users to submit and track requests. Additionally, the system's reporting, KPI analysis and custom reports capabilities allow users to gain insights into key performance metrics and make data-driven decisions.

Finally, MEX's system is highly customisable, allowing users to tailor it to their specific needs and workflows. In summary, MEX's system offers a comprehensive suite of features that help organisations improve their asset management, maintenance and overall operational efficiency.

Proudly Australian Owned since 1993

CMMS. BENEFITS.

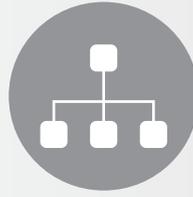

REDUCE MAINTENANCE COSTS

By prioritising equipment maintenance, you can achieve direct & measurable savings, contributing to the overall financial success of your business.

VERSATILE CMMS SYSTEM

MEX's versatility makes it suitable for a wide range of industries & applications. Implementation can be as basic or complex as the user intends it to be.

ENHANCED ASSET MANAGEMENT

MEX helps organizations manage their assets throughout their entire life cycle, from acquisition to disposal.

INCREASED EQUIPMENT AVAILABILITY

With MEX's scheduled maintenance and inspections, your equipment operates efficiently and experiences fewer breakdowns.

ACCURATE PERFORMANCE MEASUREMENT

With comprehensive data captured for each asset, including maintenance history, inspections, readings, & more. Generate reports to analyse equipment performance, track maintenance costs & identify trends.

IMPROVED REGULATORY COMPLIANCE

MEX can help organisations comply with regulatory requirements by ensuring that all maintenance activities are recorded & reported accurately.

QUALITY PRODUCT SUPPORT & TRAINING

At MEX, we pride ourselves on fostering a customer-centric culture that places a strong emphasis on providing top-notch customer service, comprehensive support & effective training.

CUSTOMISE TO SUIT MEX

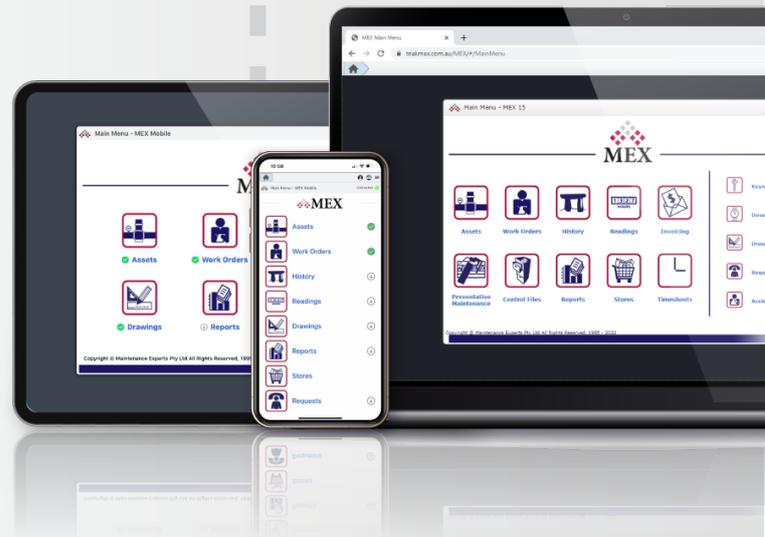

You can easily configure MEX to suit your specific business requirements, such as customising fields, forms, & workflows. Quickly integrate MEX into your existing workflows & start reaping the benefits of streamlined maintenance management.

CLOUD. SECURE. MOBILE.

With the MEX App, you can easily carry out inspections, prestarts, work orders, order parts, and capture readings on the go. No more cumbersome paper forms or manual data entry. Everything is conveniently accessible through the app, making your workflow more efficient and productive.

What's even better, if you choose to, MEX can be hosted in the Azure cloud, providing you with a secure and reliable platform. You can access your data anywhere, anytime, with peace of mind knowing that it is protected by the latest in firewalls and certifications. Your data is backed up and disaster recovery measures are in place to ensure business continuity and minimise downtime.

With an impressive uptime of 99.9%, MEX keeps your operations running smoothly without interruptions. Say goodbye to costly delays due to system downtime or technical issues. MEX is designed to be reliable and available whenever you need it.

MAIN FEATURES.

Asset Management

The focal point of MEX. Obtain unparalleled insight and visibility into your asset inventory, as it provides a comprehensive repository of detailed and exhaustive information and history for each individual asset.

Work Orders

With the ability to add, edit, print, complete and sign off work orders, MEX provides a comprehensive platform for managing all aspects of asset maintenance and repair.

Work History

A complete record of all the work you've done through the system. Information can be recalled at any point for analysis and reporting.

Preventative Maintenance

Manage all of your repetitive maintenance tasks associated with your assets. Generate periodic work orders based on either time-based or usage-based frequencies, proactively schedule and manage maintenance tasks, ensuring that your assets remain in optimal condition.

Inspections

Whether you prefer using a hand-held device, a paper checklist, or a combination of both, Inspections provides you with the tools to easily perform daily checks and tasks with unparalleled flexibility and ease.

Readings

Readings are a crucial aspect of managing the performance of your assets in MEX, providing a collection of valuable analytics obtained directly from your equipment.

Prestarts

Capture all Prestarts carried out on your equipment and ensure all results are recorded. Images are captured and all readings are sent straight through to your MEX System.

Reporting & Dashboard

By leveraging the reporting capabilities of MEX, you can gain valuable insights into your asset management practices, track maintenance performance.

Maintenance Requests

Submit work requests into MEX, which can be converted into Work Orders. Requesters can easily track the status of their requests.

OPTIONAL FEATURES.

*Purchased separately to standard MEX program

Ops Requests

Designed to simplify the process of submitting maintenance requests. Non-MEX users can submit their maintenance requests online and keep track of their requests.

Stores

Stores offers a comprehensive catalogue of spare parts, along with purchasing features, enabling you to easily keep track of your inventory.

Regions

By using Regions, users can easily access and manage data for specific sites or groups of sites, without being overwhelmed by irrelevant information.

Timesheets

MEX Timesheets provides a highly efficient method for entering trade information and hours, enabling you to easily track employee work hours.

Contractor Portal

Stores offers a comprehensive catalogue of spare parts, along with purchasing features, enabling you to easily keep track of your inventory.

Prestarts Licensing

Available in bundles of 20, Prestart licensing permits non-MEX users to perform Prestarts on the MEX App without using a MEX License.

AUXILIARY OPTIONS.

MEX offers a range of auxiliary options to enhance your maintenance management capabilities, including a **Reports Editor** that enables you to create your own customized reports, a **Downtime Recording Module** for tracking and analysing equipment downtime, an independent **Dashboard** for gaining valuable insights into maintenance performance, and a **range of customisation options** throughout the application, including the powerful "Edit Mode" feature.
