

MEX iOS app

Control Your Maintenance Operation Anywhere, Anytime with the MEX iOS App

If you always find yourself walking around your plant, notepad in hand, scribbling down requests and failures you notice along the way, only to misplace the notes later, or never even get around to inputting the data on the computer – then MEX on the iPad/iPhone is made for you. With the MEX iOS app, you will be in complete control of your maintenance operation from anywhere, and at any time.

Features of the MEX iOS app

Asset Register

With full access to your Asset Register users can add new assets, take a photo and view any data associated with your assets.

Work Orders

Manage your work, wherever you are. You can add, edit, print, complete and sign off on work orders.

Requests

Submit job requests from the palm of your hand. Users can also edit, approve, cancel and open Work Orders from requests.

Tracking

Track your Assets and Personnel with the Tracking Module. Once activated, the device's GPS location transmitted back to the MEX Database.

MEX Custom Fields

Easily customise your MEX system and add all new fields and even a whole new module that extend to the MEX iOS app.

Readings

This allows users to create new readings and be able to process existing readings for assets within MEX.

Reports

With all the MEX Statutory reports accessible through the MEX app, users can extract any piece data they need from the MEX System.

MEX Today

Personalised summary screen of your activities within MEX. It is the ultimate management tool for you to keep up to date.

GO MOBILE

Use the MEX app offline with Go Mobile. Allowing users to enter and process data in MEX without having a physical connection to a LIVE database.

MEX App View

Switch to a simplified user friendly interface containing only the bare essentials to get the job done.

MEX Stores

The MEX iOS app gives users access to Stores* specific modules. Giving you the ability to take control of your Inventory Management while on the run.

The Stores modules available on the MEX iOS app are:

Purchasing

Replenish stock, process requisitions and carry out all your purchasing anywhere, anytime.

Issue Return

Easily Issue and return parts to Work Orders with the use of barcodes to narrow down search times.

Stocktake

Allows users to process Stocktakes that already exist in the MEX iOS app.

Goods Receipt

Perform Goods Receipt and Invoice Match store items from Purchase Order.

* The Stores module of MEX will need to be purchased and registered against your database in order to allow for this module to be activated on an iOS device.
