

# Using Electronic Permits in MEX

## Add the permits you need to MEX Work Orders and Preventative Maintenance schedules

Now available in the fully browser based MEX Version 15.

### Permits in MEX

The Permit system used in MEX has an electronic form which contains a range of fields including text fields, dates, check-boxes and signatures among other types of fields. Permits are used within Work Orders and the templates defined in Preventative Maintenance Schedules.

### What types of permits can I save in MEX?

Any type of Permit can be created through the MEX Control Files and saved for use with either a work order or a PM template. Make the permit as simple as you like or comprehensive, it really depends on what information you need your permit to save. F

### What other types of fields are available for use on a MEX Permit?

Fields available for use in creating an electronic permit in MEX include check boxes, currency fields, custom controls, date picker, data driven field, documents, drop down, ellipses buttons, image placeholders, map, number, number with decimals, percentages, signature, various text boxes, time and text labels.

## Upgrade to MEX V15 today and take full advantage of MEX Permits.
