MEX Mobile Release Notes

(Build 1.19 Released 2023-02-20)

ENHANCEMENTS

General

- New Phone friendly Mobile UI design (this will default to show for new users only, existing users can switch to new mode via the phone menu toggle button). Includes:
 - Work Orders (with new Map functionality)
 - Inspections
 - Prestarts

BUG FIXES

Work Orders

- Work Order Tasks and Work Order Spares with 0 costs associated will now sync across correctly.
- Qty Used column on Work Order Spares now updates correctly after issuing spares.
- Closing a Work Order from the details page no moves the Work Order to the History Listing.

Security

- Having a mandatory field on a Work Order no longer stops you from exiting without saving the Work Order.

iOS

- App no longer crashes when bad data exists on a Work Order Spare record.

General

- Reset Mobile Management button has been added to the MEX Connection form to allow users to reset their mobile record which will sort out sync issues with Custom Fields.
