MEX Mobile Release Notes

(Build 1.12 Released 2022-01-31)

ENHANCEMENTS

Work Orders

- When 'Add Downtime Records on the Fly' option is on, a new popup will open on close of Work Order History Details that allows you to add Downtime details.

BUG FIXES

Registration

- MEX user licenses no longer get used before the login screen appears in MEX Mobile causing issues when a user is trying to login to Prestarts and no MEX licenses are available.

Security

- Adding Read Only security permissions to a field no longer gets applied as disabled and prevents scrolling of text.

Readings

- Last Reading column has now been split into two separate columns so it can be sorted correctly.

Stores

- Stock Available is now updated correctly after issuing and returning stock from Stores Issues.
- Clicking 'Email PO' in Purchase Orders or 'Email WO' in Work Orders will now populate the To field correctly on the generated email.
