RELEASE NOTES

MEX Mobile

Build 1.15

MEX Mobile Release Notes

(Build 1.15 Released 2022-07-25)

BUG FIXES

Work Orders

- Work Order Task Completed date/times are saved and displayed correctly as the user's local time.
- Work Order Task Description now shows Task Description on multiple lines.

iOS

- iOS will now scan all NFC Tag types on the latest iOS version.
- Clicking Requisition All on Work Order Spares with syncing set as manual will no longer cause issues.
- Viewing certain Inspection Audit details will no longer cause issues.
- Processing nothing on a grouped Asset Readings listing no longer stops the user from leaving the listing.
- Adding an image to a form and viewing it on the app will no longer cause issues.

Stores

- The Supplier's email address is pulled correctly to the "to" field when emailing a Purchase Order.
