MEX Mobile Release Notes
(Build 1.4 Released 2021-01-18)

BUG FIXES

General
- Auto-suggestions for the Trade Name drop down in Work Order ranges and Frequency Type drop down in Readings Ranges now filter by starts-with.
- Opening up the Options window after closing it will now open correctly.
- Drop downs located at the bottom of the form will now show full list of items.
- You can now type a decimal point directly into a numeric field as expected.

Work Orders
- Selecting the APL Only button from the Work Order Spare Catalogue Selector will now show the correct items.

Readings
- Date format for the Last Reading field is now correct.

Security
- You can now login with your Domain and User Name when Active Directory is being used with MEX Security.

Stores
- Scanning items in the Goods Receipts listing will now match items by their Supplier Barcode Number as well.
