MEX Mobile Release Notes
(Build 1.6 Released 2021-03-23)

ENHANCEMENTS

General
- MEX Today module has been added to MEX Mobile.

BUG FIXES

Work Orders
- Entering a Done Reading in the Work Order History Details will now update Asset Readings correctly.
- Catalogue Item Selector will now be shown when scanning a barcode that is associated to multiple items.
- Question sets and Headers now line up correctly in Work Order Inspections.

Stores
- Catalogue Numbers now display correctly in the Catalogue Listing when the Catalogue Number starts with a space character.
- Filtering the Catalogue Number column in Stocktake Listing now filters correctly.

General
- When Mixed Authentication is off in MEX you will no longer be able to connect over HTTP with the MEX Mobile Application.
- Borders now show around all fields on Forms.
- Custom Drop Down boxes in grids now display their selected value after the field is unfocused.
- The Quick Navigation menu now scrolls when it cannot fix on the devices screen size.
- Forms will no longer lag when selecting fields for data entry.

Readings
- Double-tapping Readings field in Asset Readings will no longer cause the application to crash in iOS.

Security/God Mode
- MEX Mobile on Android with SSO now prompts correctly for re-login.
- Custom Fields now layout correctly when a signature field is added.
- Layout will not be affected after opening up Custom Fields on a phone size device.
- Custom Fields added to grids can now be deleted.
- Marking date fields as mandatory will now validate correctly.

Requests
- Requests will not be set to read-only until the Request is approved or actioned.
